Greece is the No.1 country in recycling of electronic devices

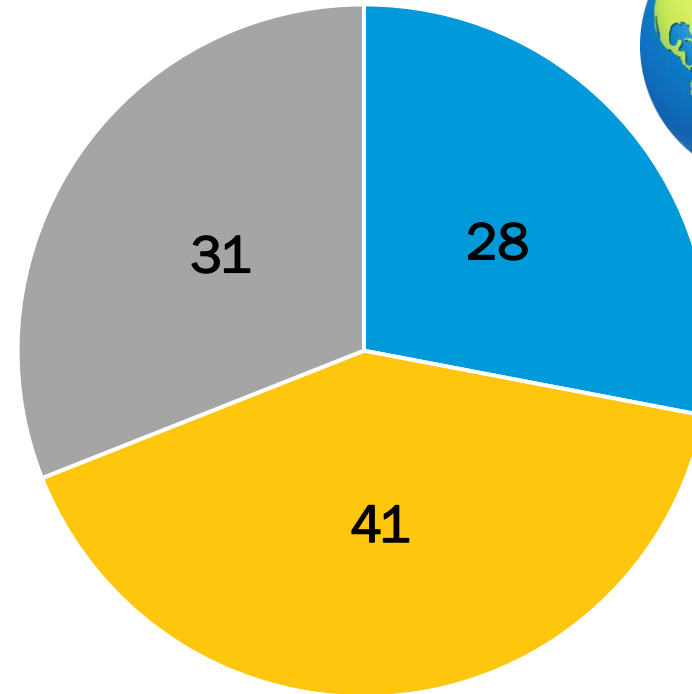

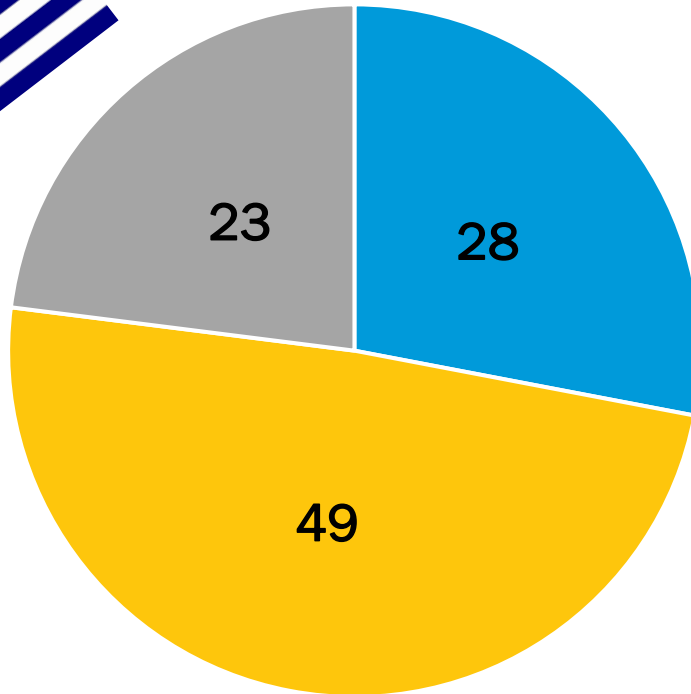

Both in Greece and internationally, the majority of population is interested in "refurbished" devices

Purchase of refurbished/recycled electronic products

%

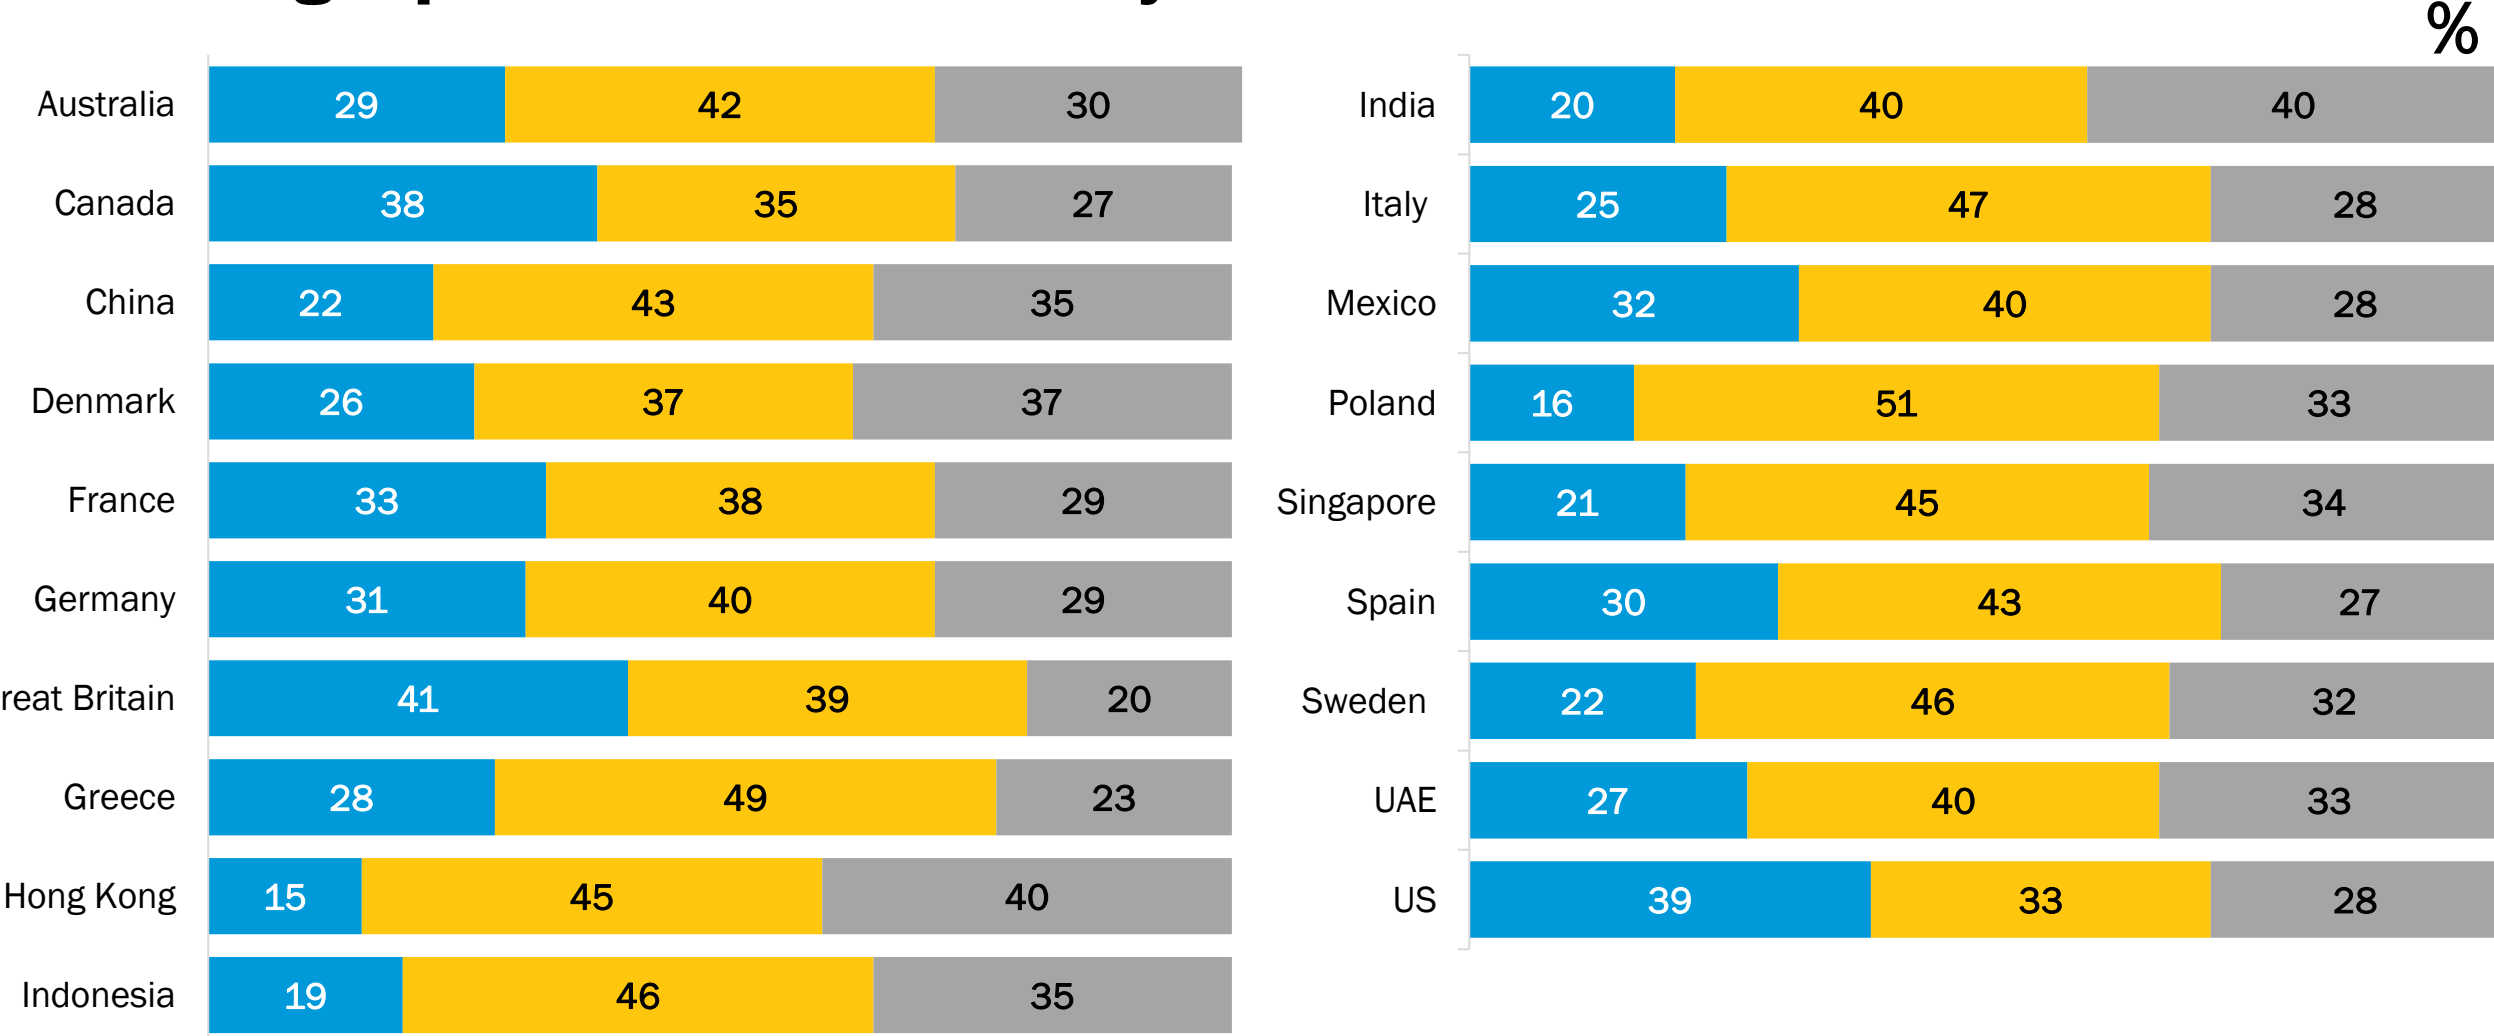

■ I have purchased refurbished/recycled electronic products

■ I have never purchased refurbished/recycled electronics but would consider it

■ I have never purchased refurbished/recycled electronic products and do not intend to in the future

Americans and the British have bought the most recycled electronic devices, while Greece comes ninth in buyers, and with a large proportion indicating a positive attitude to buy "refurbished" devices

I have purchased refurbished/recycled electronic products

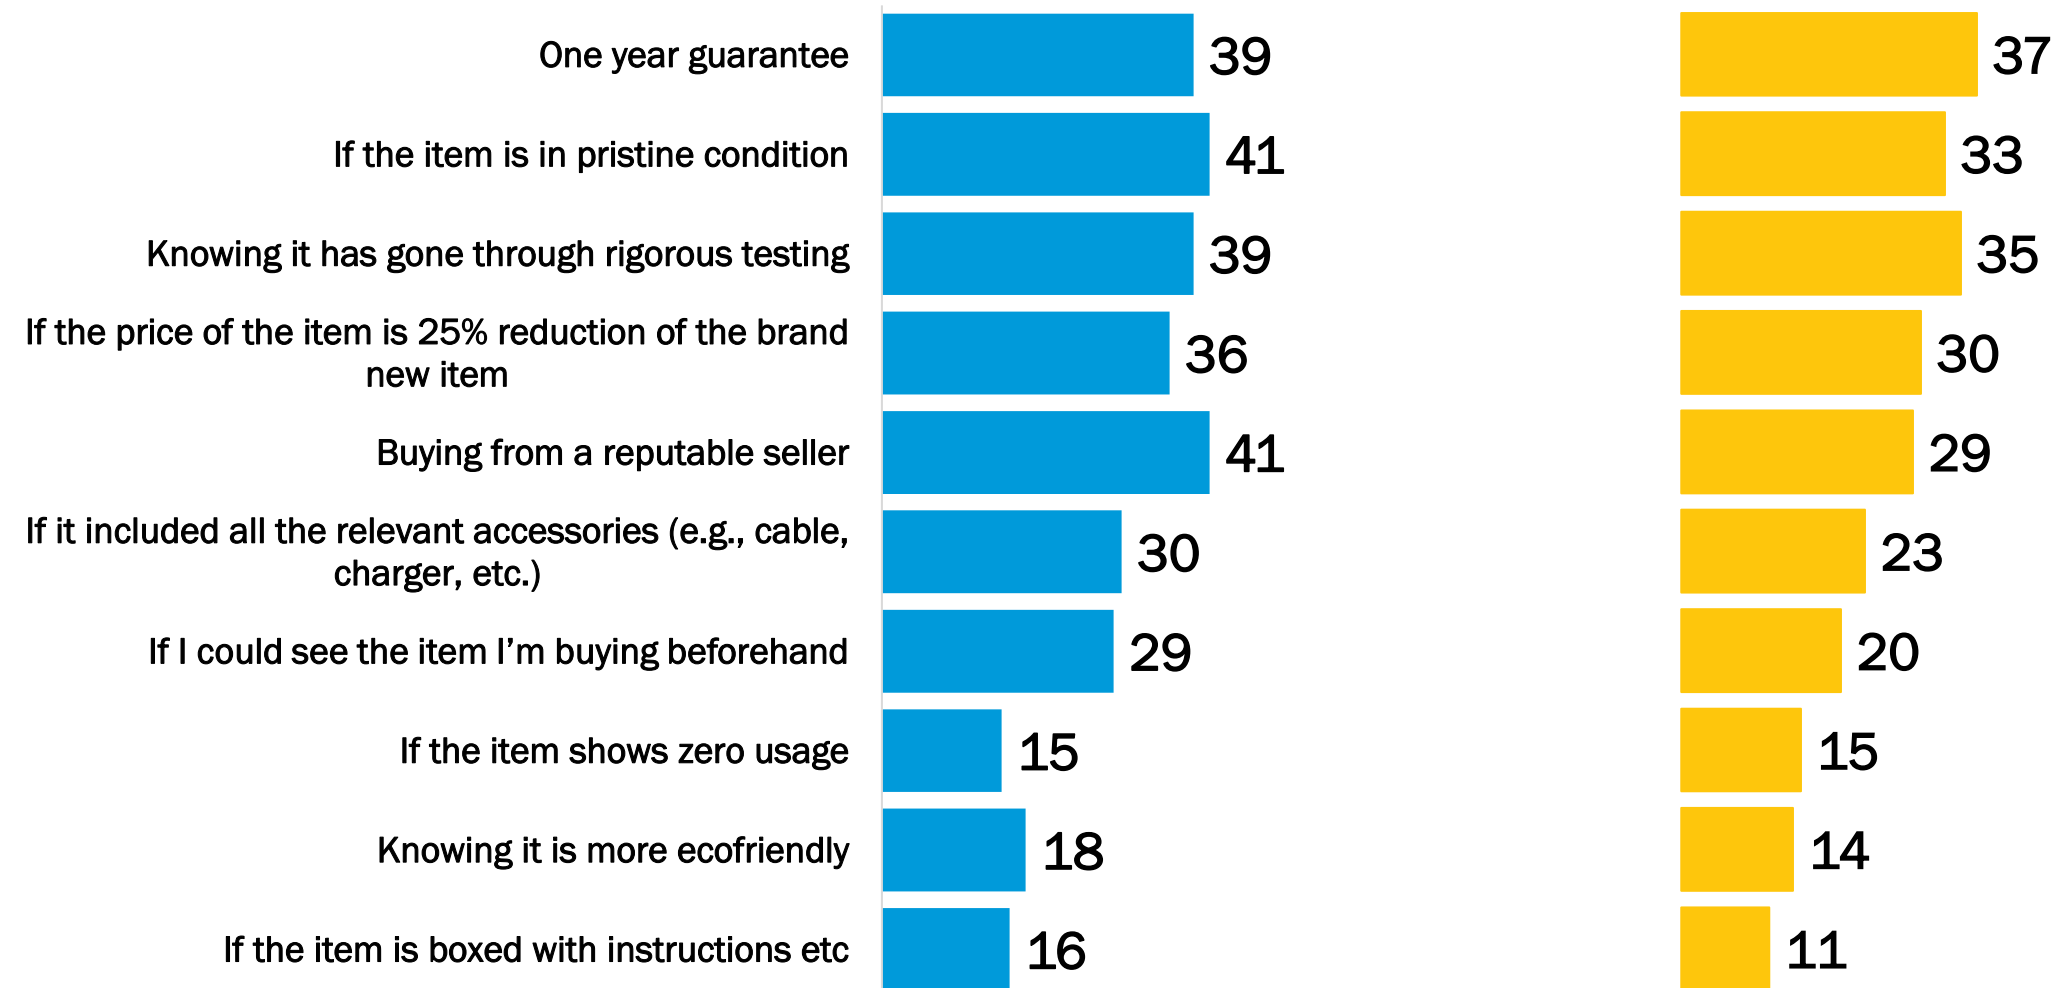

I have never purchased refurbished/recycled electronics but would consider it

I have never purchased refurbished/recycled electronic products and do not intend to in the future

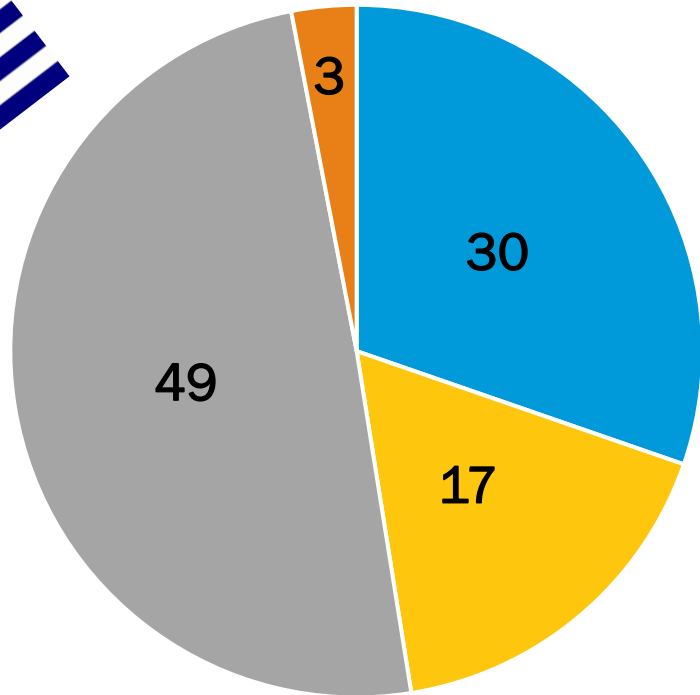

Conditions that would encourage purchase of refurbished/recycled electronic products

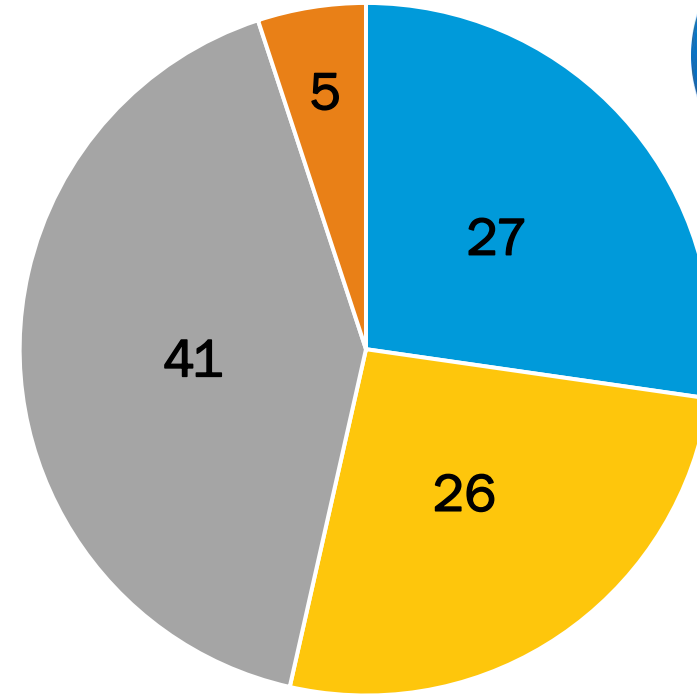

%

A considerable proportion of population both in Greece and internationally has sold used electronic devices

%

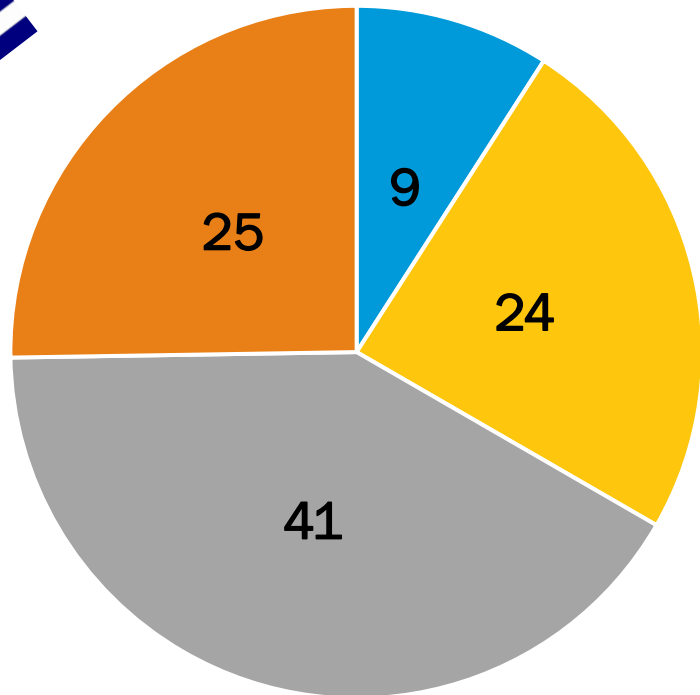

Yes, I have sold

No but I would consider it

No

Don't know/Don't remember

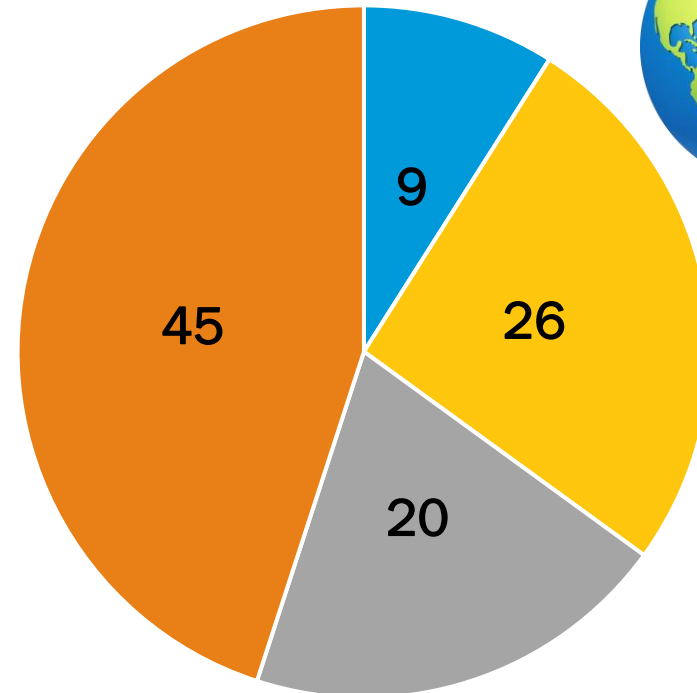

Usage and awareness of e-sim are still relatively limited both in Greece and internationally

■ I have used/I have an eSIM

■ I have never heard of eSIMs, but would like to know more

%

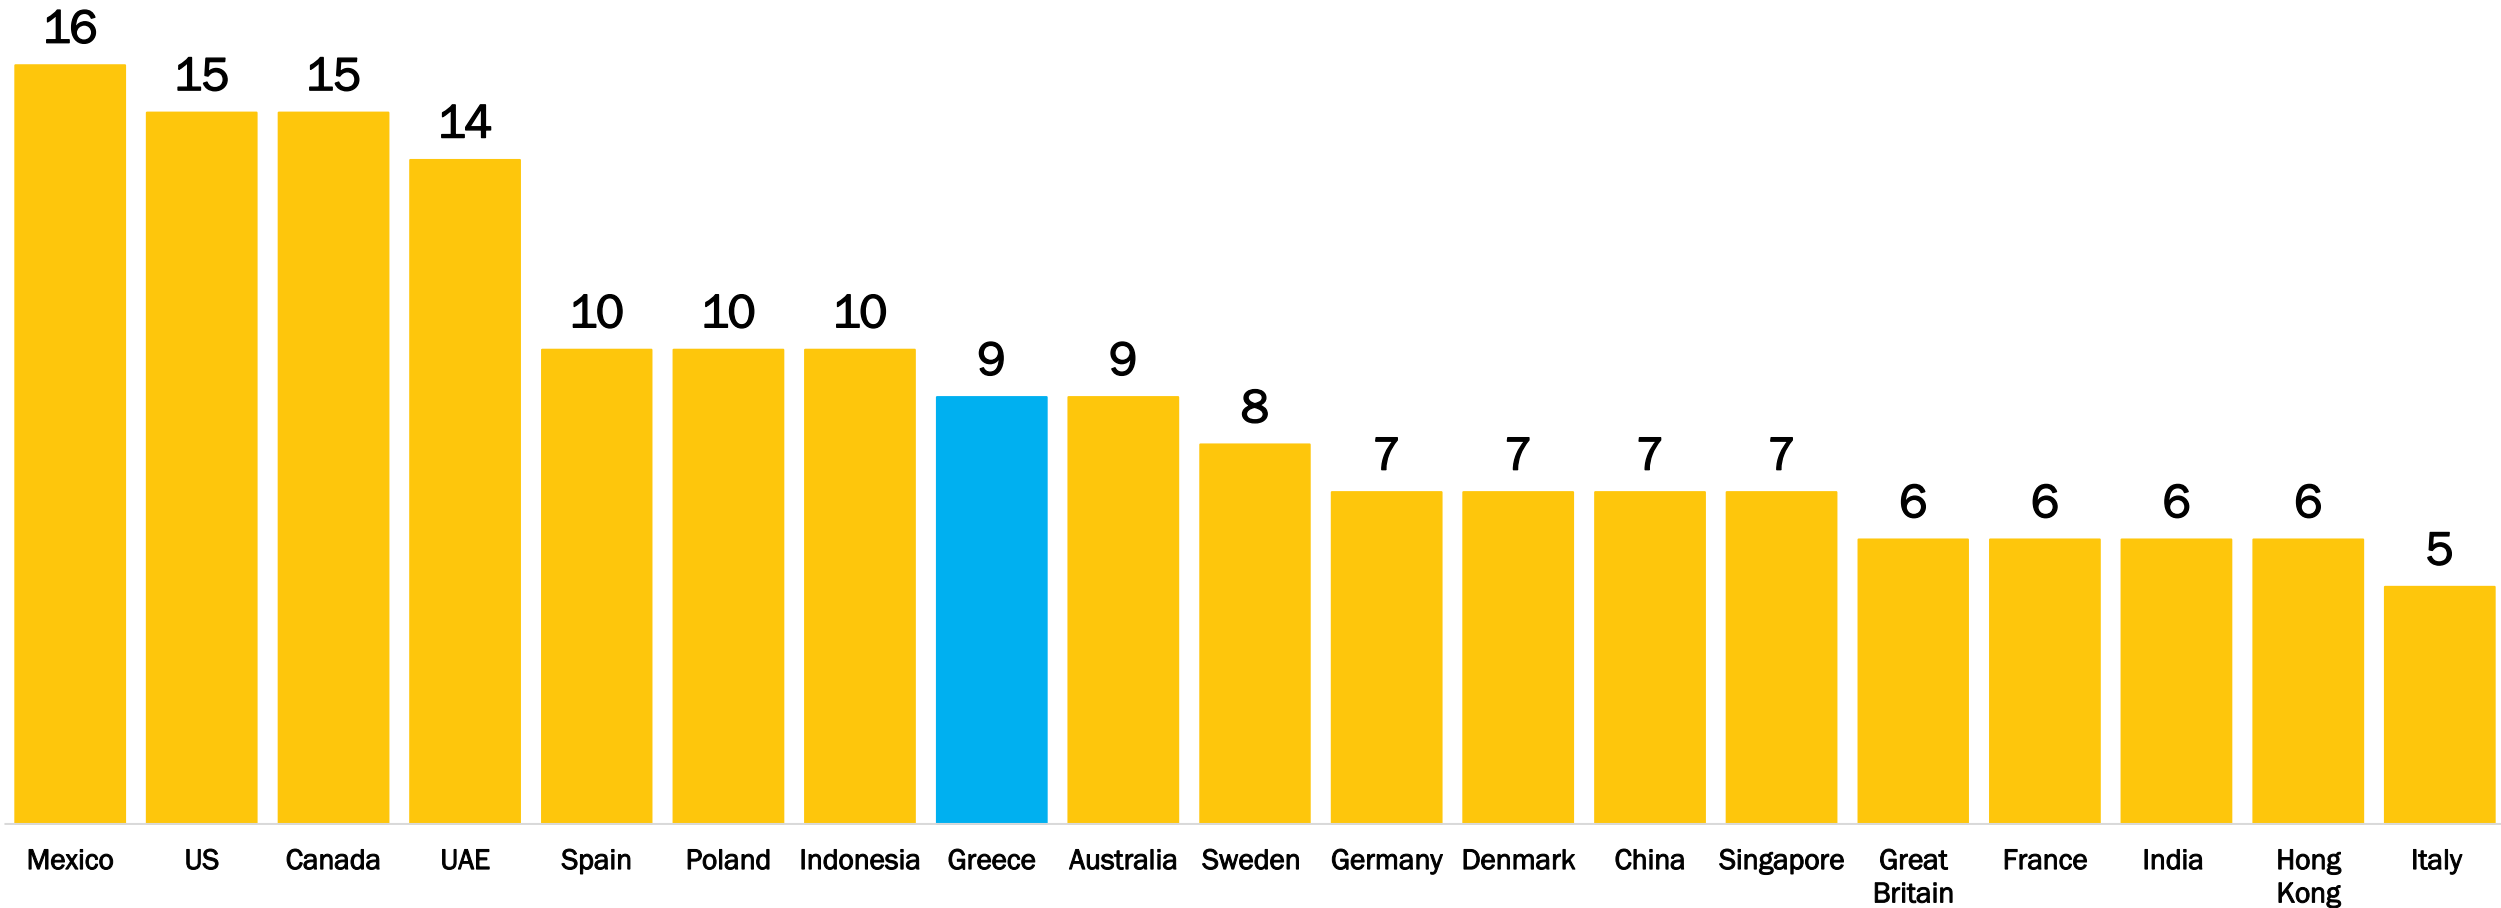

■ I am aware of eSIMs, but never used them

■ I don't know what eSIMs are

Mexico, USA, Canada and UAE show a higher usage of e-sims as compared to other countries
