# **General Attitude of Greeks towards Artificial Intelligence**

# The view of Greeks on the impact of AI on society remains almost the same

The impact of AI on society will be...

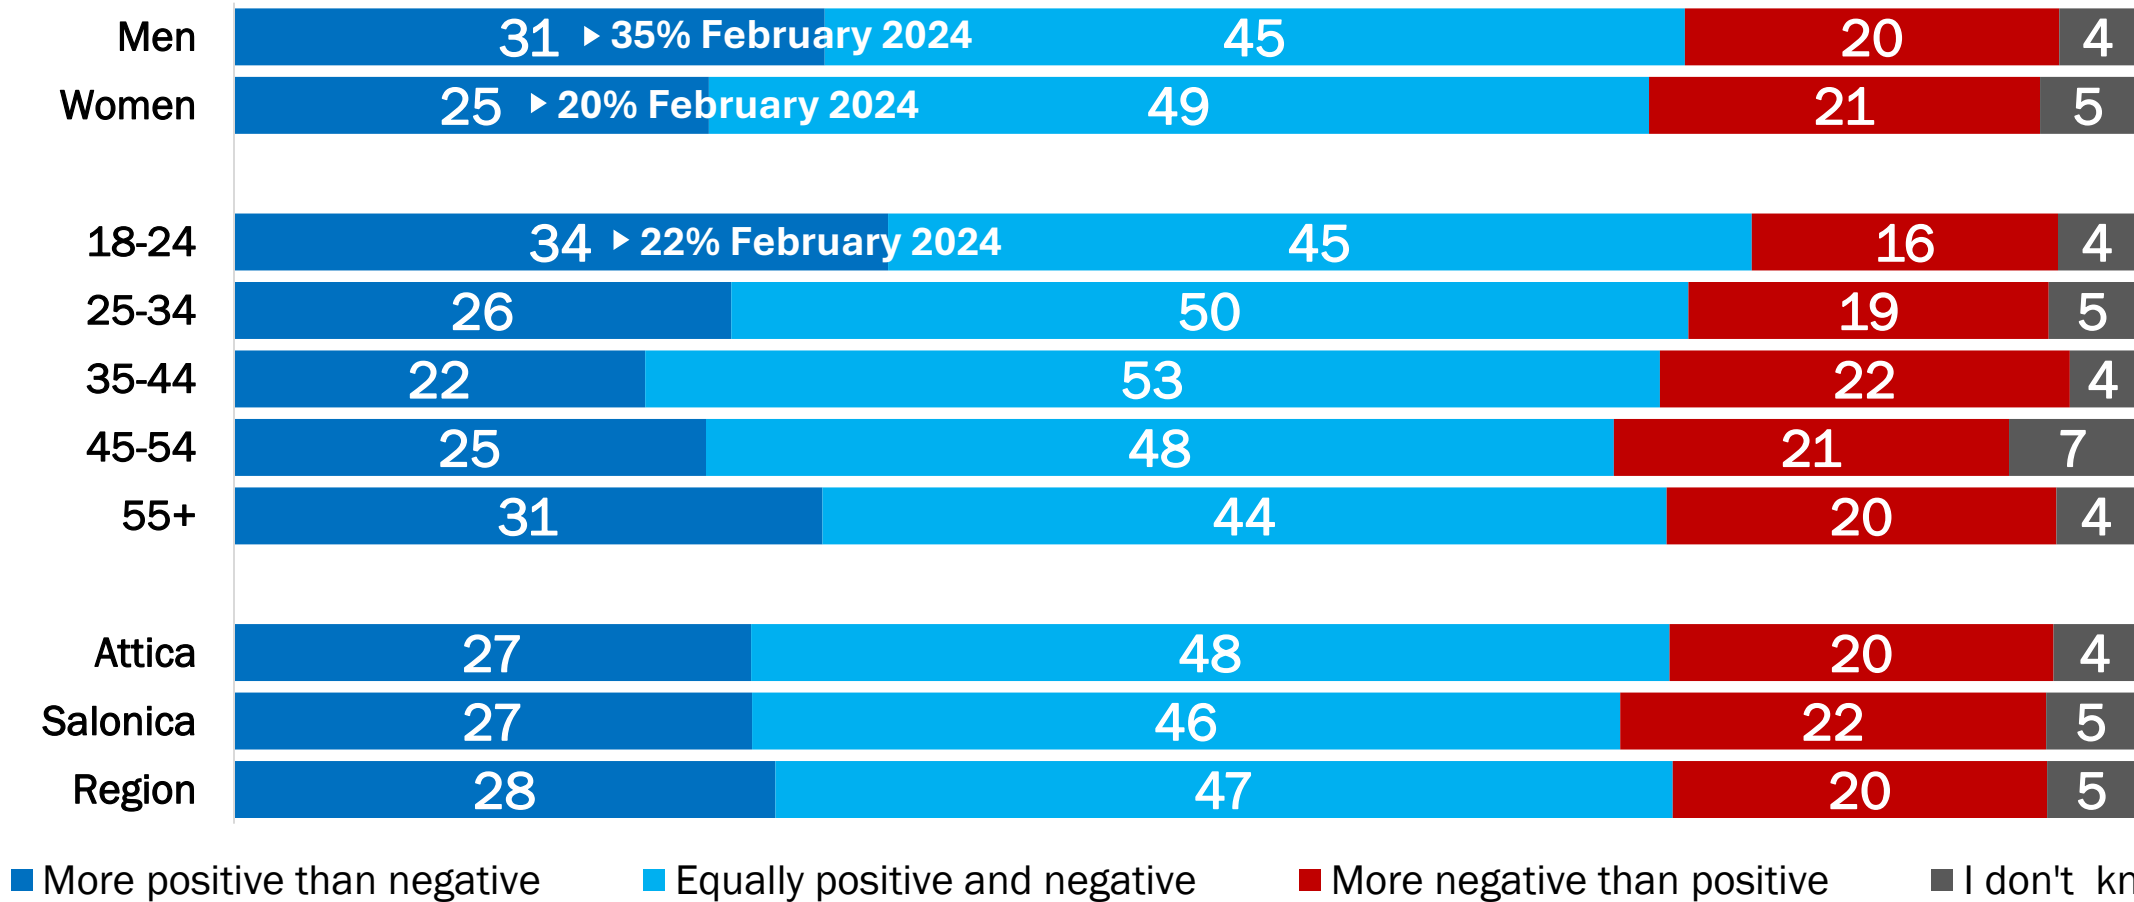

Over time, the percentage of Greeks who have not formed any opinion on AI has decreased by more than 50%.

# Women are starting to catch up with men, while in the age groups the landscape is beginning to clear with young people now being very positive

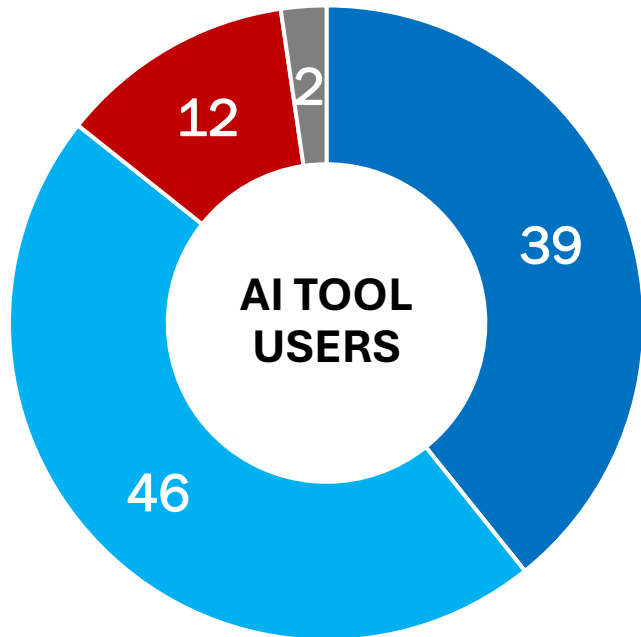

The impact of AI on society will be...

%

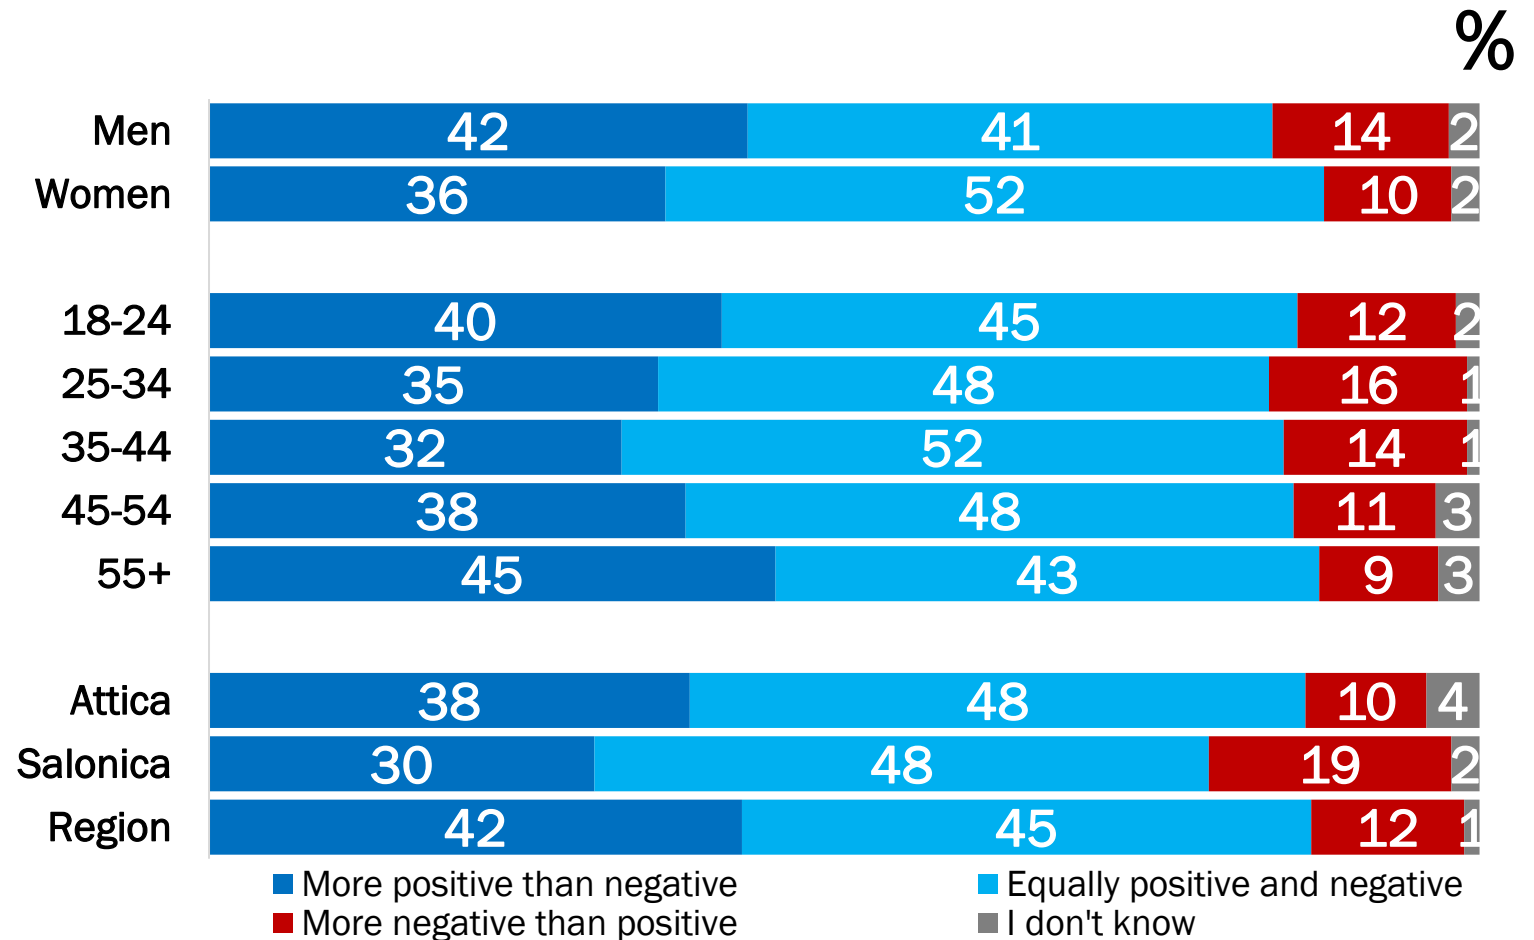

# As expected, AI tool users have a much more positive expectation as regards the future impact of AI on society

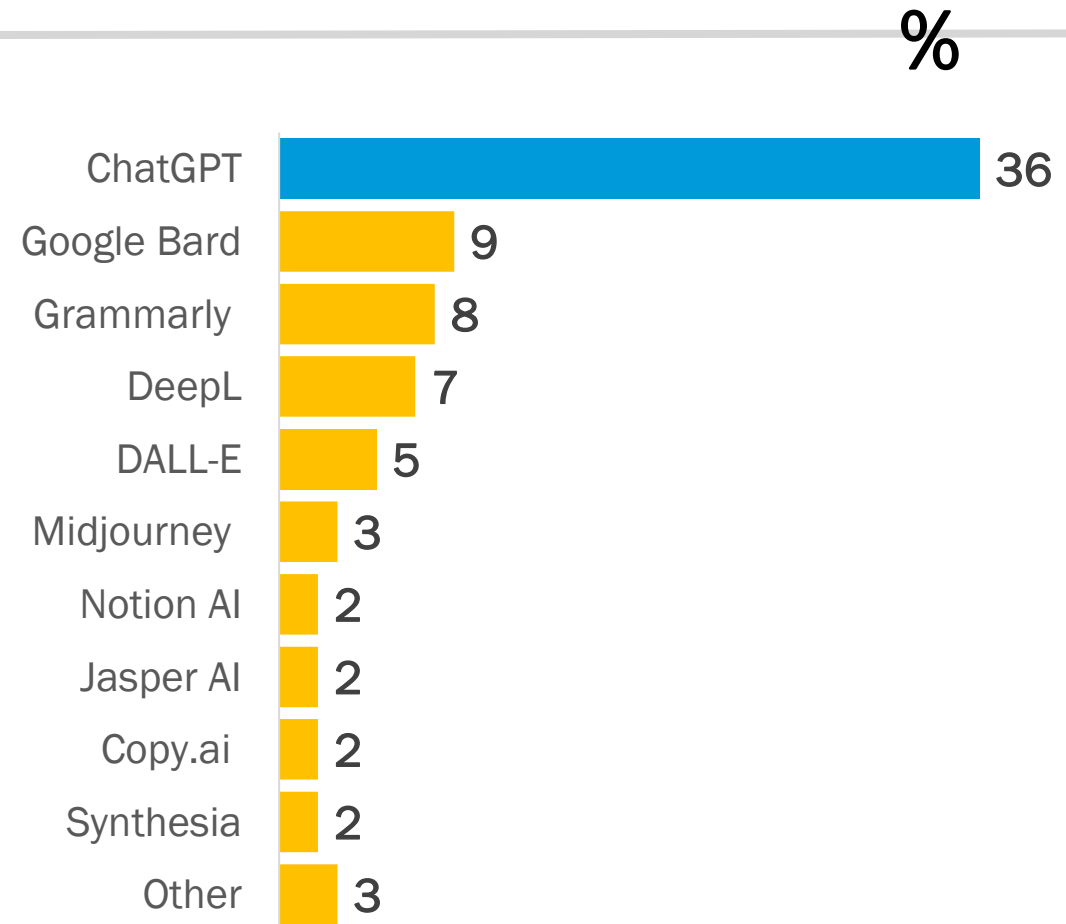

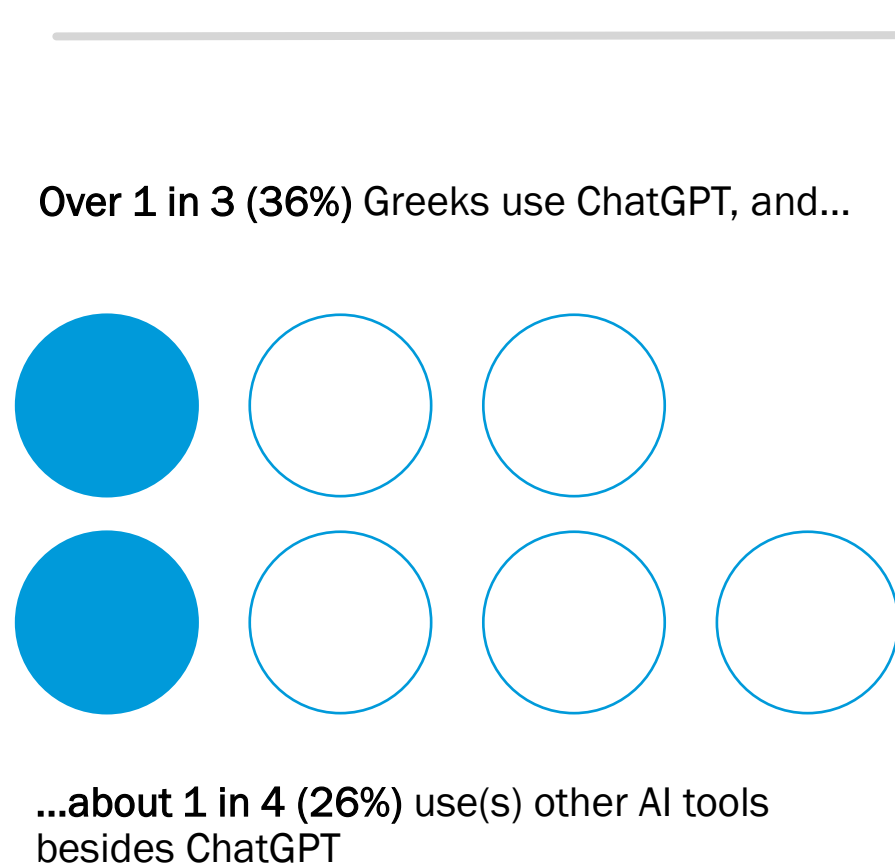

The impact of AI on society will be...

Those who know more have a more positive attitude

# ChatGPT is the most popular AI tool but Greek citizens use other options as well

# Almost two out of three Greeks believe that AI will improve their job prospects

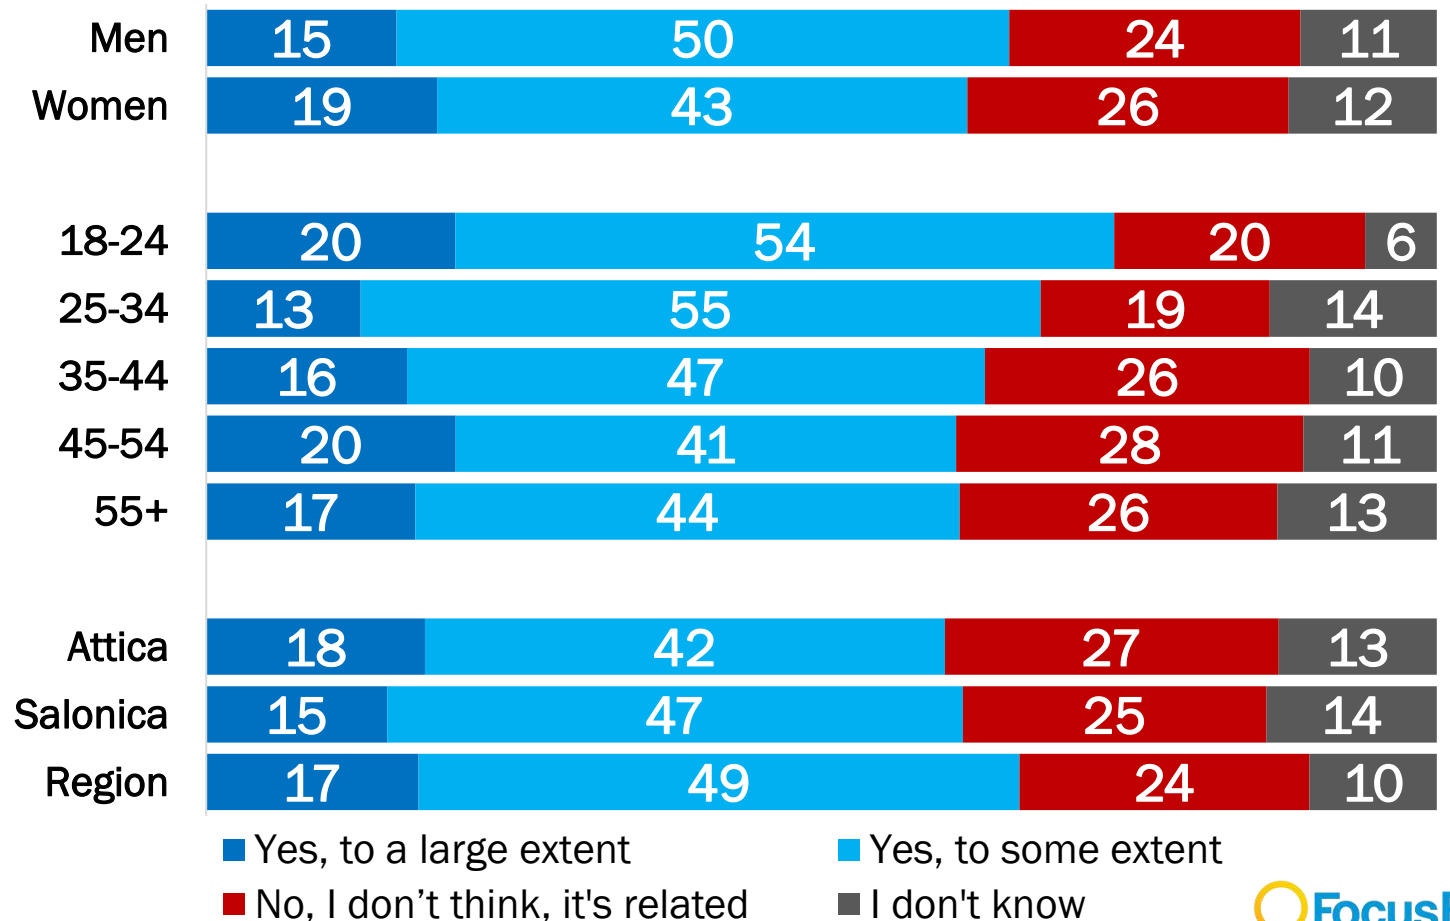

Do you think that using and knowing AI tools can improve your career prospects?

%

**63%**

(Yes, to some extent - Yes, to a large extent)

■ Yes, to a large extent      ■ Yes, to some extent  
■ No, I don't think, it's related      ■ I don't know

# Of course, those who are most positive about the help in their career are those who already use AI

Yes, to a large extent

Yes, to some extent.

No, I don't think it's related

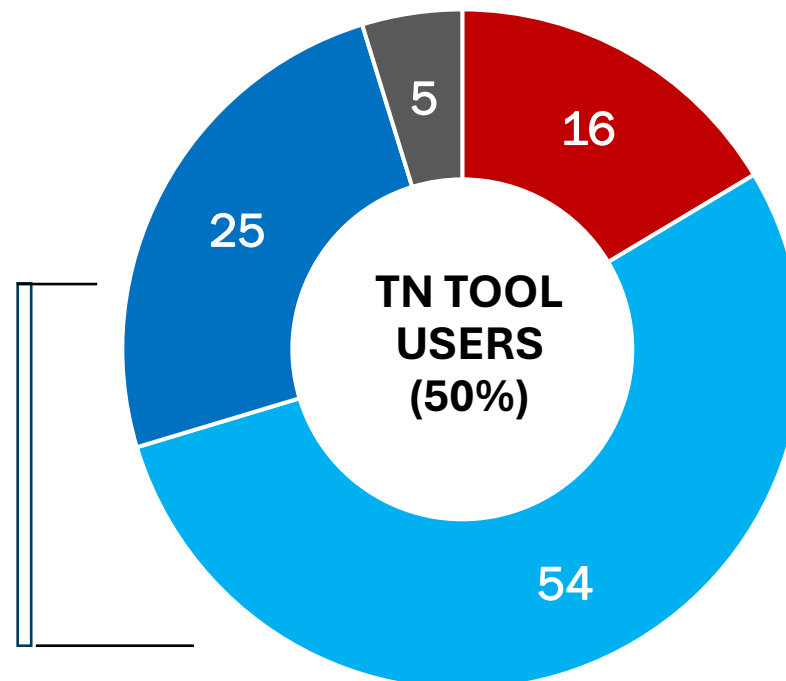

I don't know

%

**63%**

(Yes, to a large extent - Yes, to some extent)

**79%**

(Yes, to a large extent - Yes, to some extent)

# At the same time, however, AI seems to be a threat to a significant proportion of the public

Do you think AI could replace your job in the future?

%

**42%**

(Yes, I believe it and I am very worried - Yes, and I am worried to some extent)

■ Yes, I think so and I am very worried  
■ No, I don't think so  
■ I have no opinion

■ Yes, I think so and I am worried to some extent  
■ No, I don't believe it

# Those who already know and use AI tools seem equally insecure

Yes, I do and I'm very worried

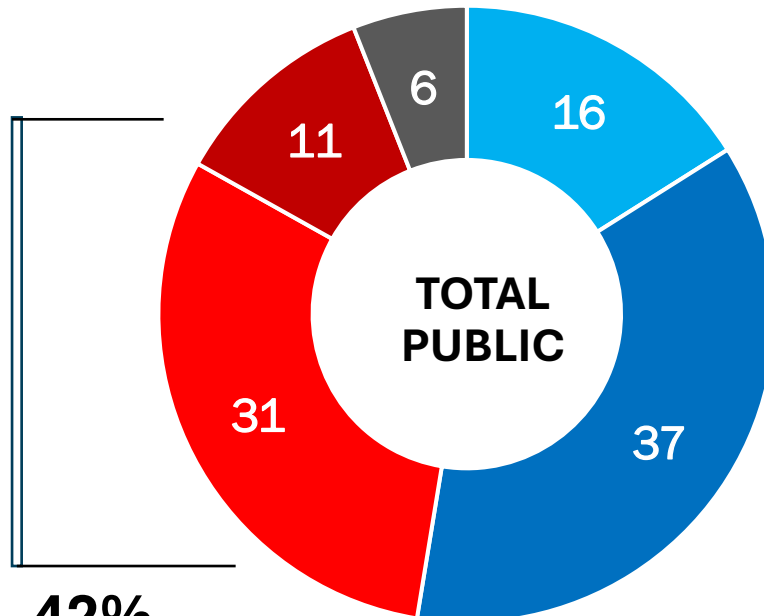

Yes I do and I'm concerned to some extent

No, I don't think it's likely

No, I don't believe it.

I have no opinion

%

**42%**

(Yes, I believe it and I am very worried - Yes, and I am worried to some extent)

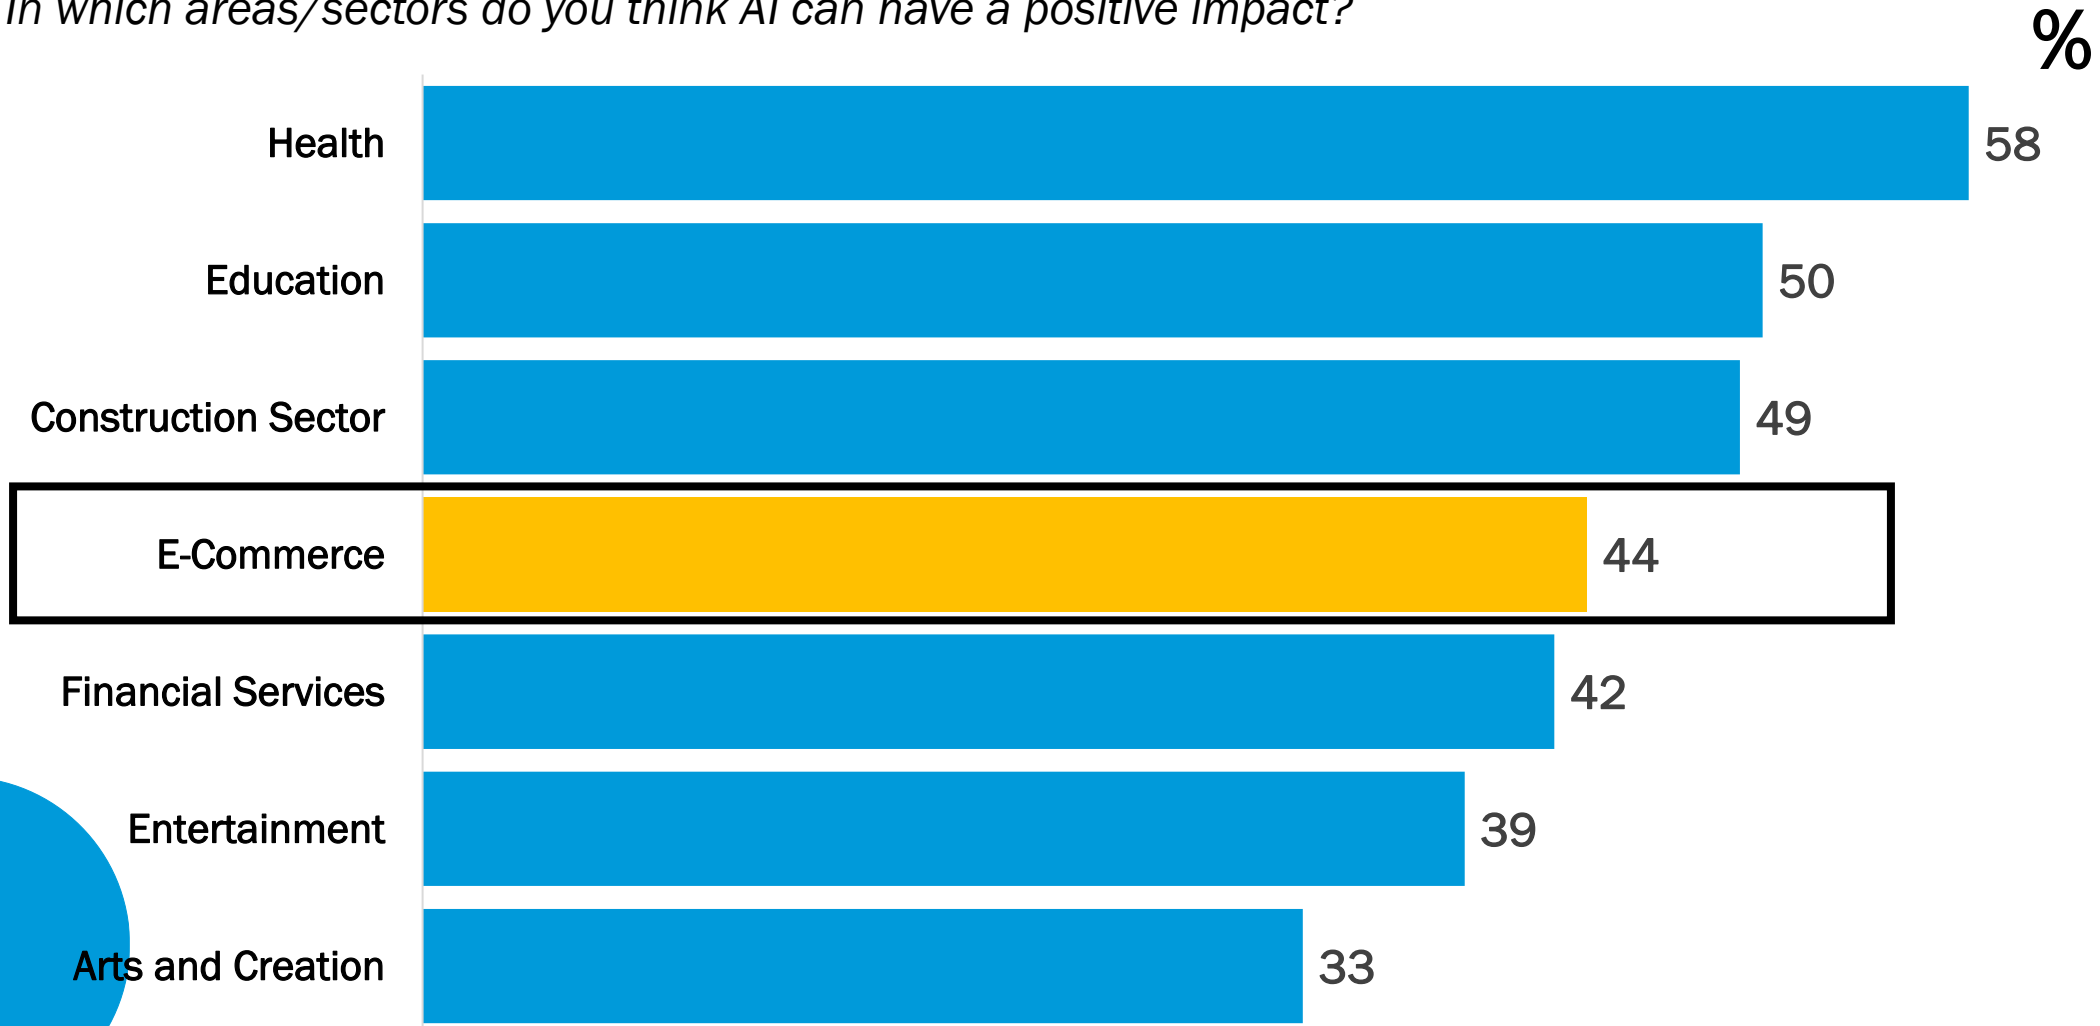

**41%**

(Yes, I believe it and I'm very worried - Yes, I worry you to some extent)

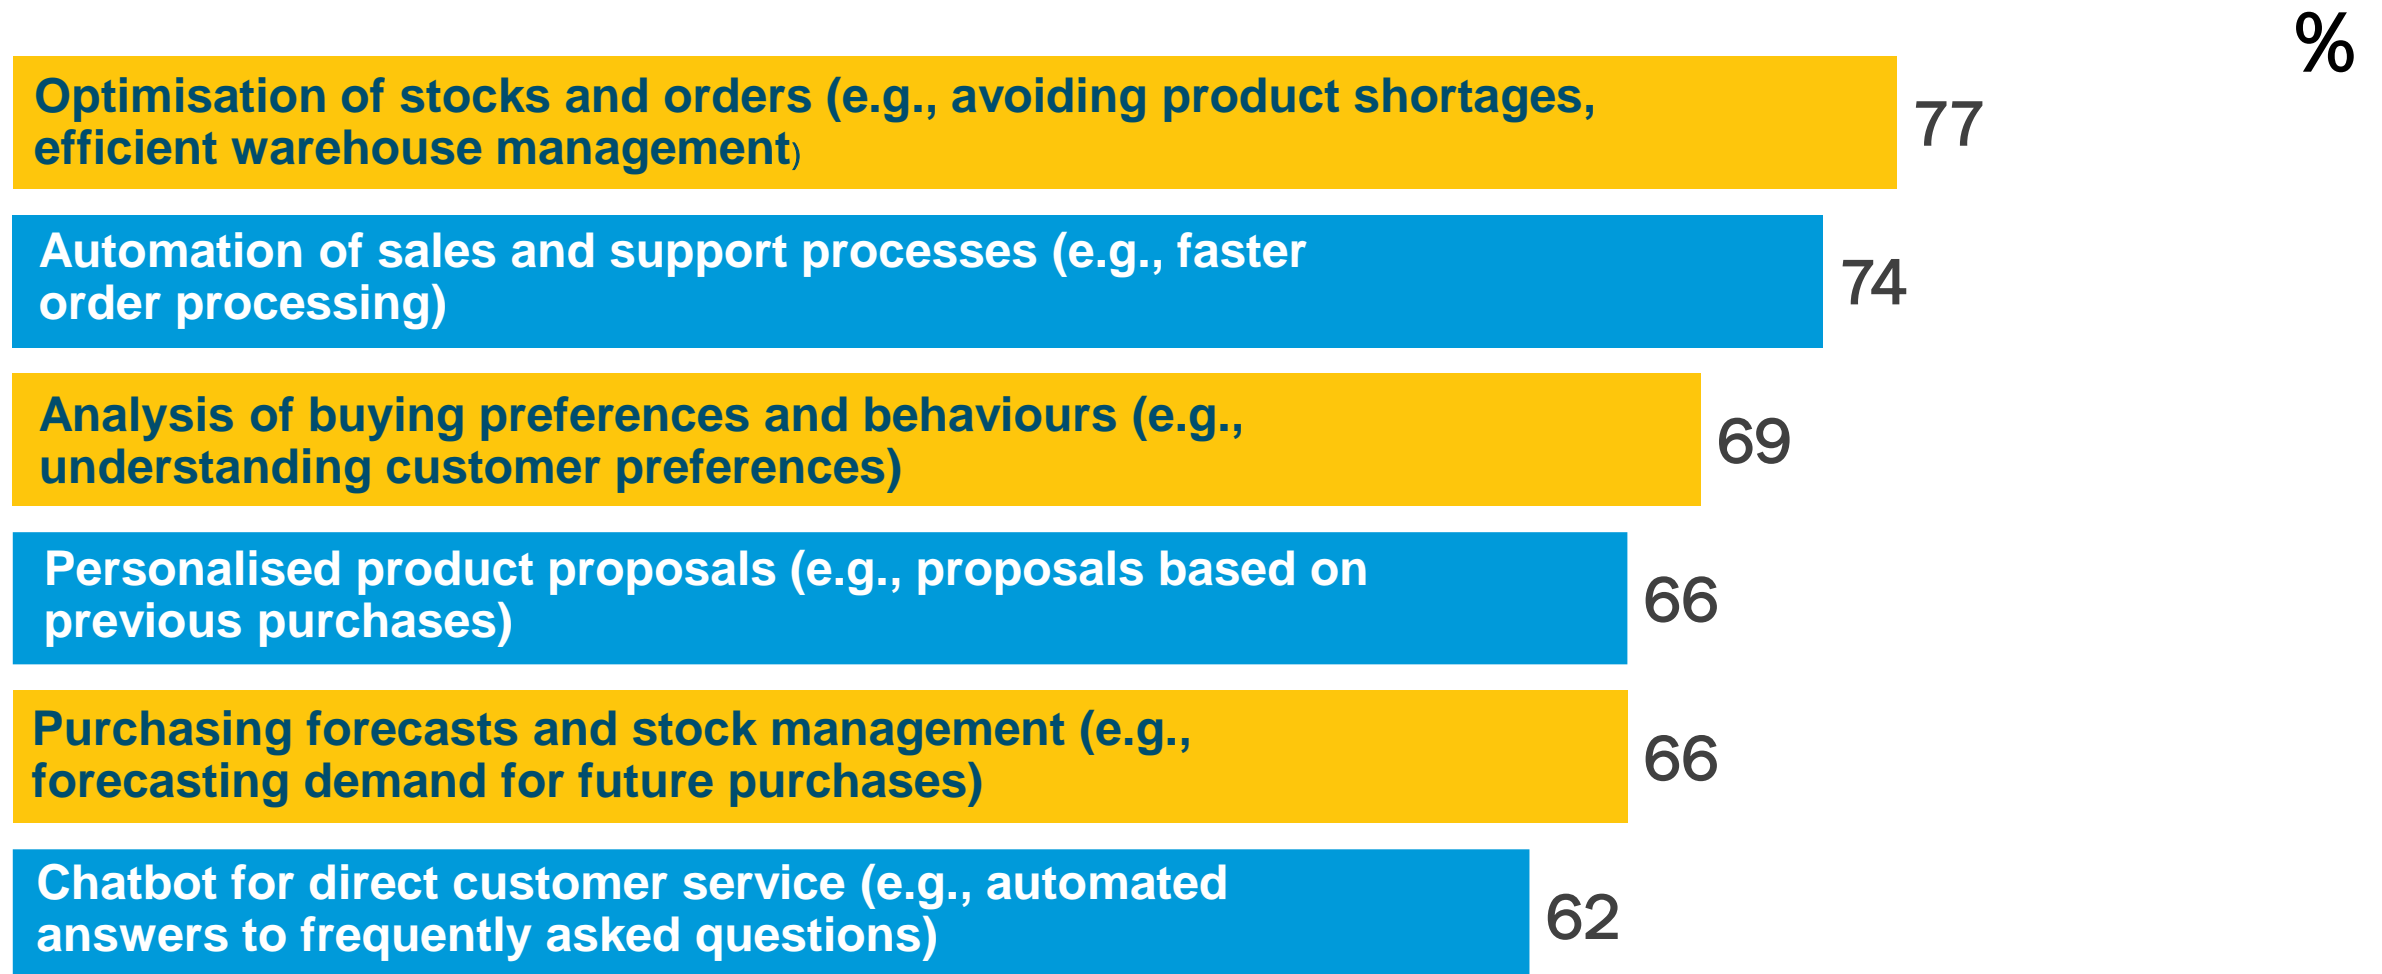

# Artificial Intelligence & e-commerce

# Nine out of ten Greeks (89%) expect the use of AI to help several sectors

*In which areas/sectors do you think AI can have a positive impact?*

# The contribution of AI to e-commerce is expected in several areas that improve the operation and customer experience

# **Fears & concerns about AI in the future**

# Four out of five Greeks believe that AI can lead to fraud and misinformation

How likely or unlikely do you think it is that AI could enhance the potential for fraud and misinformation?

%

- Not at all likely
- Slightly likely
- Moderately likely
- Quite likely
- Very likely

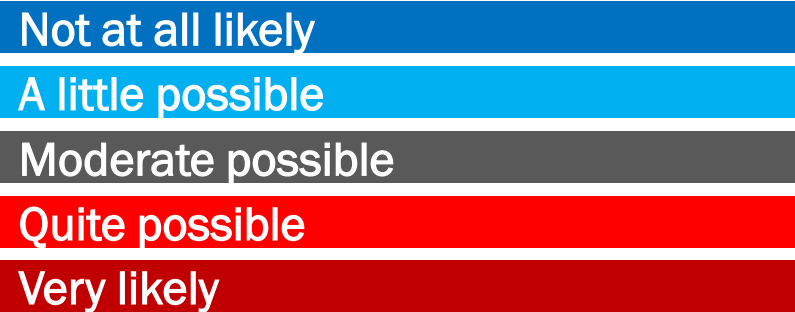

**79%**  
(Quite likely - Very likely)

■ Not at all/Slightly likely   ■ Moderately likely   ■ Quite/Very likely

# The likelihood of fraud/misinformation is expressed by both the general public and the users/knowledgeable users of AI

How likely or unlikely do you think it is that AI could enhance the potential for fraud and misinformation?

%

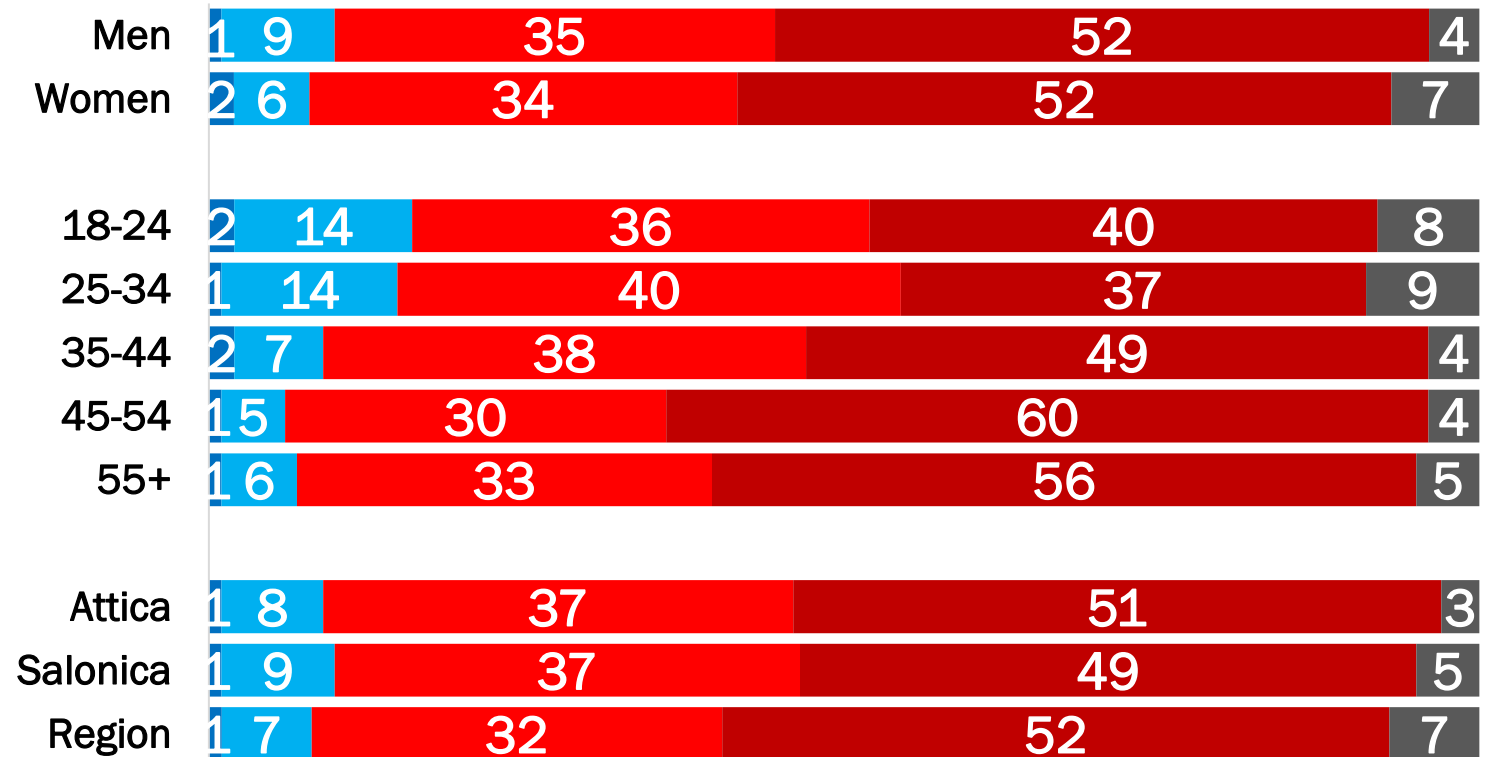

**79%**  
(Quite likely - Very likely)

**78%**  
(Quite likely - Very likely)

# As a result, more than one in two Greeks express serious concern that serious fraud can be committed through AI

Lately, there have been rumours about the use of AI to create fake identities or frauds, using voices, faces or other personal information. How concerned are you about this possibility? %

■ Does not worry me at all
 ■ Worries me a little
 ■ Worries me quite a bit
 ■ Worries me a lot
 ■ No opinion

# And of course, the use of AI tools does not necessarily imply trust in these tools

It doesn't worry me at all

It worries me a little

It worries me enough

I'm very concerned

I have no opinion

%

Only 1 in 50 AI tool users say they are not concerned that AI may contribute to the potential for serious fraud.

# Therefore, more than three out of five Greeks consider that strict regulations are needed to protect citizens from possible fraud due to malicious use of AI

Do you believe that the use of AI should be regulated to protect individuals and society?

%

- Yes, strict regulation is needed
- Yes, it needs some adjustment
- No, the existing regulation is sufficient
- No, more regulation could slow down the progress of technology
- I have no opinion

# The proportion of AI users who consider strict regulation of AI use appropriate is equally high

%

Only 1 in 20 AI tool users say that no more adjustment is needed in using AI.

# Key Learnings

---

1

The view of Greeks on the impact of AI on society remains more or less the same over time, including both positive and negative aspects/expectations

---

2

The public expects that the use of AI will bring improvements in a wide variety of industries, and especially in e-commerce will improve both the better management and operation of the store and the customer-consumer experience

---

3

Today, one in two Greeks use AI tools, with ChatGPT leading the way, and knowledgeable users have a better view of AI and an increased belief that it helps them in their career/professional development

---

4

Despite its positive aspects, it is expected that AI can lead to misinformation and fraud, a view shared by the public that uses it, and therefore, almost all Greeks believe that there should be strict protection measures
